Second Section of 152 Bumps Into the First Section of the Same Train.

Fireman George Kittenger Has an Arm Broken, and an Engine and Ten Cars Derailed.

HAPPENINGS IN RAILROAD CIRCLES

The second section of freight No. 152 ran into the first section of 152 last night about midnight between Newbern and Trimble, Tenn., and the engine of the second section and ten freight cars were derailed. The cause of the collision is not known.

Mr. George Kittenger, fireman on the engine of the second section, had an arm broken but aside from this no other injuries are reported. The caboose on the first section suffered much damage and is almost a total wreck. The wrecker from Paducah was called out directly after the report of the wreck was made to the officials here.

The wrecker was called out Thursday night to a place not very far from the present wreck to replace several cars that had been derailed.

No one in the latter accident was injured.

These are the first accidents of any seriousness that have happened on either the Louisville or Memphis division of the I. C. in some time.

Master Mechanic Barton returned from the wreck today at noon and reported it not serious.

The cause of the wreck was the breaking in two of the first section of the train which dropped back onto the second. Six cars were demolished. A brakeman named Ellison, colored, was badly cut and bruised about the head and was brought to the city in an unconscious condition. His injuries are considered serious.

Mr. Pat Glavin, roadmaster of the Louisville division of the I. C., was in the city last night. He returned to Louisville this morning on the early morning accommodation.

Special car No. 4, often used in the pay car train and also by several of the higher officials of the road, as a car of inspection, passed through the city this morning en route to Louisville, where it will be used as the sleeping quarters of Chief Detective O'Keefe and his force during the big convocation at Louisville. Mr. O'Keefe is chief of detectives of the I. C. and will leave Chicago, with about one dozen of his men tonight, reaching Louisville tomorrow morning.

The car was deadheaded to Louisville on the accommodation along with two others that had been brought along to be used in the excursion trains. The traveling people, especially those who go to attend the convocation will be afforded ample protection and no better police or secret service men than the I. C. force of special agents can be had.

An official announcement is made that the new owners of the Frankfort and Cincinnati railroad will extend and improve that line. The road now runs from Paris to Frankfort, Ky. Eastern capitalists purchased it for an investment. Col. George B. Harper, the new president of the road, says the improvements will be extensive, but is not now prepared to make the details public.

Train No. 151, conductor Hart and Engineer Mercer, struck Mrs. M. E. Dunn at Jones' Road crossing, on the I. C. near Eddyville, last evening about 6 o'clock and bruised her considerably. Dr. Linn, of Kuttawa, was summoned and administered medical treatment. It is thought that she is not seriously injured. She was struck while attempting to cross the tracks. Mrs. Dunn is about 60 years of age.

The projected railroad from Tiptonville, Tenn., to Fulton, Ky., to cost \$100,000, is said to be meeting with much encouragement. The road will be steam and not electric, as first supposed.

A SAD DEATH.
The infant daughter of Mr. and Mrs. Harry Livingston died suddenly last night at the family residence on Broadway near Ninth, aged four months. The funeral will take place at nine o'clock in the morning from the residence, burial at the Jewish Cemetery.

WILL CONTEST.
The Gabmen Do Not Want to Be Kept Away.

They Say They Have a Right to Back Up to the Depot Platform—Legal Fight Probable.

Last night and this morning the Illinois Central union depot presented a warlike appearance at the arrival of the trains.

Several weeks ago the Palmer, Wilkerson and Kirby Transfer company bought the privilege of working the trains on both the N., C. and St. L. railroad and the I. C. railroad and a certain portion of the platform was set aside for the use of the above hacks and cabs of the above mentioned firm.

The other cab lines were not permitted to go within the boundaries of that portion set aside but were made to stay behind a distance of several hundred feet.

The position left for the outside hacks was not the very best and consequently the business fell off with them.

Last night the outside cabmen broke over the line and into that portion set aside for the Palmer Transfer Co. cabs and would not keep within their limit. The same thing was repeated this morning and today at noon. Officer Tom Orr, who is stationed at the depot, was unable to do anything with them. He could only stand by and prevent personal trouble. The outside cabmen say that they intend to make a test case of the affair and the railroad company says that if beaten in the courts it will fence in the whole platform and run its depot to suit itself.

The case will be an interesting one and will settle a question that has long caused trouble at the depots.

GOOD SPREAD.
Don't miss the lunch set at the New Richmond bar tonight.

Interior Expansion Kills Cow.
Some powerful yeast-cake caused the death of a cow in Larimer county, Colorado. It is stated that the animal, while rummaging through a summer kitchen found and swallowed an old umbrella and a cake of yeast. The yeast, fermenting in the poor beast's stomach, raised the umbrella, and she died in great agony.

FINE LUNCH.
The best lunch you ever ate at the New Richmond bar tonight.

Secretary Cortelyou Works Hard.
George B. Cortelyou, secretary to the president, works harder and for longer hours than almost any other employee of the government, except the president himself. He is at the white house at 9 a. m. and works until 6 or 7. At 10 he returns to his office and is there with the president until 12, and sometimes until 1 or 2.

Big Pay for Writing a Book.
Col. George M. Smith, the London publisher, in his literary recollections, publishing in Cornhill, says that George Eliot got \$25,000 for "Romola," and might have had \$50,000 if her asthetic conscience had allowed her to divide the novel into 16 parts, as Mr. Smith wished.

Example of His Topik.
There seems something entirely harmonious in the announcement that Dr. John P. Wood of Coffeyville, Kan., who has just celebrated his ninety-ninth birthday, has closed a contract for a series of lectures on "Longevity." Dr. Wood is still in the active practice of medicine.

France requests in America.
During the year just ended the total amount of bequests in this country was \$62,467,144, against \$79,749,965 in 1899. The amount given to educational institutions in 1900 was \$14,332,444; to charities, \$13,521,723; to churches, \$8,005,705; to museums and art galleries, \$2,145,233, and to libraries \$2,961,000.

Cultured Conductors in Boston.
Boston newspapers assert that the conductors on their local traffic lines are the most cultured ticket collectors to be found anywhere. They insist that many of these Yankee sages speak several languages and carry college diplomas in their inside pockets.

True Edge of Continent.
The eastern edge of the North American continent is overflowed by the sea, and the water near the coast is shallow. To find the true edge of the great continental land mass one would have to travel about eighty miles due eastward from New York.

Corporations in New Jersey.
During the last year 6,963 corporations were organized under the laws of New Jersey, and as a tax on their paid-in capital stock they paid the state the aggregate sum of \$2,951,209, representing a paid up capital of \$2,061,209,000.
